

# TAYLOR-JOHNSON TEMPERAMENT ANALYSIS<sup>®</sup>

## Individual Report

Name: **ROBERT WHITE**

Date: 9/12/2007

Name of Counselor: PPI

Answers By: **Self**

The Taylor-Johnson Temperament Analysis<sup>®</sup> (T-JTA<sup>®</sup>) measures nine basic personality traits, or attitudes and behavioral tendencies that are important components of personal adjustment and significantly influence interpersonal relationships. The T-JTA is designed to help you understand the role of these traits in your everyday life and in the way you view your present circumstances. The T-JTA can provide a framework for you to better understand yourself, your strengths, and any overall problems you may currently be experiencing.

This Individual Report is designed to assist you in remembering what you learned during the interpretation, to reinforce areas of strength and to focus your attention on areas for further exploration or discussion. Your results represent your feelings about yourself at the time when you answered the test questions.

### SUMMARY

#### T-JTA Traits

#### Areas of Strengths

Light Hearted  
Active Social
