The Taylor-Johnson Temperament Analysis® (T-JTA®) measures nine basic personality traits, or attitudes and behavioral tendencies that are important components of personal adjustment and significantly influence interpersonal relationships. The T-JTA is designed to help you understand the role of these traits in your everyday life and in the way you view your present circumstances. The T-JTA can provide a framework for you to better understand yourself, your strengths, and any overall problems you may currently be experiencing.

This Individual Report is designed to assist you in remembering what you learned during the interpretation, to reinforce areas of strength and to focus your attention on areas for further exploration or discussion. Your results represent your feelings about yourself at the time when you answered the test questions.

**SUMMARY**

**T-JTA Traits**

**Areas of Strengths**
- Light Hearted
- Active Social
- Expressive-Responsive
- Dominant
- Self-disciplined

**Areas for Attention:**
- Nervous
- Indifferent
- Subjective
- Hostile

*Important decisions should not be made on the basis of the T-JTA without confirmation of the findings by other means.*
TAYLOR-JOHNSON TEMPERAMENT ANALYSIS
Criss-Cross Report

Name: ROBERT WHITE
Date: 9/12/2007

Name of Counselor: PPI
Answers By: Self
And by: JOAN, His Wife

The Taylor-Johnson Temperament Analysis ® (T-JTA ®) measures nine basic personality traits, or attitudes and behavioral tendencies that are important components of personal adjustment and that significantly influence interpersonal relationships. The T-JTA is designed to help you understand the role of these traits and their implications in your everyday life, to reveal the way you view your present circumstances, and perhaps, to provide a new way to look at any overall problems you may currently be experiencing.

This Criss-Cross Report is designed to assist you in remembering what you learned during the interpretation, to reinforce areas of strength, and to focus your attention on areas for further exploration or discussion. The results represent your feelings about yourself at the time when you answered the test questions. In Criss-Cross testing, T-JTA results also show the way another person describes you when answering the same test questions.
